Continuation of Attachment(s) 3. Information Disclosure Statements (PTO/SB/08), Paper No./Mail Date: 05182005; 09132005; 10142005; 06222006; 12302003.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest starch having the instantly claimed properties or source for obtaining such a starch. Fredriksson et al. *Carbohydrate Polymers* (1998), Vol. 35, pages 119-133 (Fredriksson) teaches that the botanical source of the starch will have an impact on the physico-chemical properties of starch. This influence might be attributed to the granule size distribution, to the crystallinity (degree and/or polymorphic form), to the organization of the molecules within the granule or to the chemical nature of the starch polymers. A transgenic plant cell transformed with a nucleic acid molecule comprising a nucleotide sequence that encodes a protein of SEQ ID NO: 1 or 2 was first described by applicant in US 6,207,880 and US 6,815,581.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
